Report submitted by Feedback Committee (2021-22)

Understanding Students' aspirations, views and suggestions in the form of Feedback is basically about the institutional practices, processes and frameworks that take into account the students' concerns of the quality of the education they receive. This practice assumes that there is an important relationship between the student's environment and learning, and that evaluation of that total learning environment is a necessary exercise. It normally includes following:

- Survey of the learning environment through questionnaires
- Student identity is kept confidential.
- Findings from Feedbacks have to be acted on by the management.
- Students have to be informed of action that has resulted in the expression of their views.
- Publication of student feedback and results i.e. encouraging transparency and openness.
- Reporting in accessible ways so that students find it understandable.

Through the Feedback activity, student participation may include helping them to understand their role in quality assurance of the college; to participate actively in the development and maintenance of quality provision of higher education and to be active players in creating an environment conducive to innovations and initiatives for an enriched campus life and development of Quality Culture within the institution.

In order to promote student participation in assuring and promoting the Quality, following different Feedback were collected.

- Student feedback on teaching-learning-evaluation and other related activities.
- Students Satisfaction Survey
- Parents Feedback
- Alumni Feedback
- Mechanism for follow-up action on all these feedbacks.

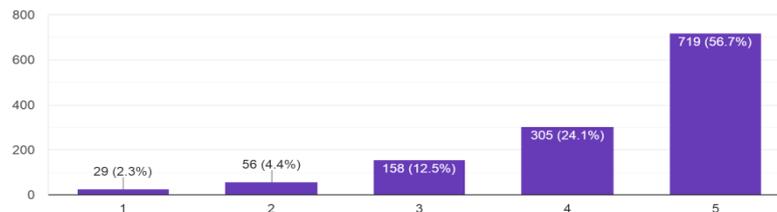

Students' Feedback Report – 2021-22

The institute feels that, students can become more responsible and sincere and develop a sense of belonging to the organization if they are given a chance to directly participate in the process. It also feels that students' response would help the institute in general and the teaching faculty in particular in understanding their aspirations, requirements, keeping the academic programs, the courses and course contents up to the mark and also fulfilling their learning-teaching demands. Therefore it has been using a Feedback system to collect the students' aspirations, constructive reactions /suggestions on courses, course contents and handling of the courses as well as infrastructure facilities available for them.
